Oxygen and humidity are converted into oxidizers

Using a process similar to natural sunlight

Oxidizers surround surfaces to control contaminants

How does ActivePure® Technology work?

1. Uses oxygen and humidity from the air
2. Converts into powerful oxidizers
3. Destroys microorganisms in the air and on surfaces
4. Kills pathogens on contact
5. Safe for astronauts - Safe for everyone

ActivePure® is the only Certified Space Technology™ from NASA in the world

Vollara® is recognized for using technologies derived from space programs and adapting these technologies for everyday use. The result is the most effective technology ever developed to purify the air and reduce contaminants in the air and on surfaces. ActivePure Technology is based on a variation of the technology originally developed by NASA researchers to protect life on the International Space Station. Our Technology is recognized as the exclusive Certified Space Technology by NASA's Space Foundation in its category. We own exclusive worldwide rights to this technology.

vollara[®] AIR & SURFACEPRO

This small but powerful air purifier uses ActivePure[®] Technology to eliminate smoke, odors, and other contaminants in the air.

WHAT'S POLLUTING YOUR HOME?

- Poor outdoor air quality
- Garbage cans
- Athletic clothing
- Mold spores and pollen
- Cooking odors
- Pets

WHAT IT DOES

- Reduces airborne and surface contaminants
- Removes odors and freshens air
- Removes dirt and dust from the air
- Uses a UVC light to oxidize and ionize the air
- Provides ozone-free air and surface cleaning

SO WHAT IS ACTIVEPURE[®] TECHNOLOGY?

ActivePure[®] Technology is based on technology originally developed by NASA for use during space travel. Now, it can be used in your own home to reduce up to 99% of airborne and surface contaminants such as allergens and bacteria.

In 2017, ActivePure[®] Technology was inducted into the Space Technology Hall of Fame by The Space Foundation.

HOW ACTIVEPURE[®] WORKS

ActivePure works by harnessing microscopic oxygen and water molecules in the air and then forcing them through a honeycomb-like matrix inside the Vollara Air & Surface Pro. While inside the matrix, the molecules are transformed into safe-yet-powerful oxidizers that are then released back into the air to seek and destroy contaminants like mold, fungi, and odor.
